MEMORANDUM

TO: The Alamo Community College Family

FROM: Dr. Bruce Leslie, Chancellor

DATE: September 19, 2008

SUBJECT: **American College & University Presidents Climate Commitment**

Attached is the [Environmental Commitment](#) that I, along with 578 of my national colleagues, have signed. My action pledges the Alamo Community Colleges to take specific actions designed to reduce greenhouse gases and other contributors to global warming. The Commitment provides a clear design and timeframe; but as you should know, ACC has already taken very deliberate steps, having received awards for our efforts, that have established the foundation for this pledge. Under the board's direction, we are taking further steps to become as "green" an institution as possible, enhancing our ability to make this Commitment.

Specific information will be forthcoming as this project takes shape. I wish to encourage the entire ACC Family to help contribute to this Commitment, for our efforts will be much enhanced with everyone's participation. Please consider how you may contribute and participate and let the committee know of your interest as soon as it has been organized.
